

IMON MALLIK

JAVA FULL STACK DEVELOPER

+91 79806 73984 | imonmallikedu2004@gmail.com |

Address: 1B/A3-11/95, Mukherjee Para Road, Mukherjee Gate, Kolkata, West Bengal – 700141 |

GitHub: github.com/Cyberpokemon | LinkedIn: linkedin.com/in/imon-mallik-2821a8358

PROFESSIONAL SUMMARY

Dedicated Computer Science undergraduate with strong expertise in full-stack development, backend systems, and software engineering. Skilled in developing scalable web applications, RESTful APIs, and performance-oriented tools using Java, Spring Boot, React, and PostgreSQL. Passionate about problem-solving, clean code practices, and building practical technology solutions.

EDUCATION

- **Bachelor of Technology (B.Tech)** - Computer Science & Engineering
St. Thomas' College of Engineering and Technology | Kolkata, West Bengal | 2023 – 2027
- **ISC (Class XII)**
Vivekananda Mission School | Kolkata, West Bengal | 2023 | Aggregate: 96.5%

TECHNICAL SKILLS

- **Programming Languages:** Java, C, Python, JavaScript
- **Frontend:** React, HTML, CSS
- **Backend:** Spring Boot, Spring Security, REST APIs
- **Microservices:** Spring Cloud, Eureka, API Gateway
- **Databases:** PostgreSQL, Oracle, MySQL
- **Tools & Platforms:** Docker, Git, Linux

PROJECTS

QuizNova — Full-Stack Quiz Hosting Platform

Tech Stack: *React, Spring Boot, PostgreSQL, Gemini API*

- Built a full-stack quiz platform with real-time participation, timer-based auto submission, rankings, and answer review system.
- Developed RESTful APIs using Spring Boot and PostgreSQL with Hibernate/JPA integration.
- Integrated Google Gemini API for AI-generated quiz questions and answers.

Log Analyzer in C — High-Performance CLI Tool

Tech Stack: *C, Makefile*

- Developed a high-performance log analysis tool in C for processing large-scale log files efficiently.
- Implemented log-level classification (INFO, WARN, ERROR, UNKNOWN), top error filtering, and analytical reporting features.
- Applied defensive programming techniques including null checks, memory validation, and safe string handling for stable execution.
- Optimized buffered file parsing to process 100M log lines (~4.5GB) at ~2.1M lines/sec.
